

## Template Making for RPQM's Clickbank Mall

### Templating Explanation:

Our example is the templateneu.php, this is the third with the color white.

### SETTINGS

```
<?  
include "session.php";  
include_once "config.php";  
?>
```

Just add this in every template you want to create. It means to include the sessions and configuration to your template.

### TITLE

```
<?php echo $site_title ?>
```

This means to display the site title. Usually we use it in the title tags for example:

```
<title><?php echo $site_title ?> </title>
```

### CSS Style

```
<?php echo $style ?>
```

This means to display the style of the css.

```
<link href="<?php echo $style ?>" rel="stylesheet" type="text/css">
```

## Background Header Image

```
<?php echo $wheader ?>
```

This means to display the image file for the header background.

```
<td width="459" background="<?php echo $wheader ?>">
```

## Rotating Banners

```
<?
$rs_t=mysql_fetch_array(mysql_query("select count(*) from cbj_ads where
paid='yes' and credits>displays"));

$cnt= $rs_t[0];

if ($cnt==0)
{
echo "<a href='advertise.php'><img src='images/default_banner.gif' width=468
height=60 border=0></a>";
}
else
{

$rs_t_query=mysql_query("select * from cbj_ads where paid='yes' and
credits>displays");

$num=abs( mt_rand(1,$cnt) ) ;

for ($i=0;$i<$num;$i++)
{
$rs_t=mysql_fetch_array($rs_t_query);
}
$id=$rs_t["id"];
$url=$rs_t["url"];
$bannerurl=$rs_t["bannerurl"];
echo "<a href='$url'><img src='$bannerurl' width=468 height=60 border=0></a>";
mysql_query("update cbj_ads set displays=displays+1 where id=$id");
}

?>
```

You just copy and paste it anywhere in the html and it will display the rotating banners.

## Upper Navigation

```
<ul>
<li class="selected"><a href="index.html">Home</a></li>
<li><a href="signinform.html">Login</a></li>
<li><a href="signup.html">Create a Mall</a></li>
<li><a href="add-resource.html">Add Resource</a></li>
<li><a href="showtop.html">Top Resources</a></li>
<li><a href="articleindex.html">Articles</a></li>
<li><a href="feedback.html">Feedback</a></li>
<li><a href="linktous.html">Link To Us</a></li>
<li><a href="faqs.html">FAQs</a></li>
<li></li>
</ul>
```

Just put it inside the table and it will fit in the table.

## Basic Left Column

```
<?php
    if (isset($_REQUEST["cid"]) && $_REQUEST["cid"]!="")
    {
        $cid=$_REQUEST["cid"];
    }
    else
    {
        $cid=0;
    }

    mempanel();
    searchboxleft("Search"); //you can use searchbox() to display
searchbox or alter this categories or

alter this

    categoriesleft("Categories");
    featuredleft();
    newsletter();
        subcategories($cid);
        latest($cid);
        popular($cid);

        // left($cid); //default
        adsense1("ui");

?>
```

So if you have a table like this:

```
<table cellpadding=0 cellspacing=0 border=0>
<tr><td width=200> Put it here </td>
<td width=350>Content</td>
<td width=200>Right Column</td>
</tr>
</table>
```

And what are those code?

```
if (isset($_REQUEST["cid"]) && $_REQUEST["cid"]!="")
{
    $cid=$_REQUEST["cid"];
}
else
{
    $cid=0;
}
```

This code checks if there is a category selected. It is needed to check if the user click a category or sub-directory for us to display the right content or category. **\$cid=0** means no selected category.

### Member Panel

```
mempanel();
```

This simple code displays the member panel. This will display only when the member is logged on.

### Search Box

```
searchboxleft("Search");
```

The title of the search box is **Search**.

The image shows a search interface. At the top, the word "Search" is written in red. Below it is a search box containing an empty text input field, a "Go" button, and a dropdown menu. The dropdown menu is currently open, showing the text "Business to Business" and a downward-pointing arrow.

## Categories

```
categoriesleft("Categories");
```

This displays the category with the title **Categories**

## Featured Products

```
featuredleft();
```

This displays the featured products.

## Newsletter Box

```
newsletter();
```

This displays the newsletter box. User can subscribe here.

**Newsletter**

Name

Email

### Sub-Categories

```
subcategories($cid);
```

This displays the categories. So if you put this in the center then it will display in the center and because we use it in the left then the categories will be displayed in the left column of the table. This will display only in the second page because the default don't have a selected category.

#### Sub-Categories

Business to Business  
( 928)

Education ( 254)

Publishing ( 151)

Industrial ( 31)

Management ( 137)

New Products ( 709)

Reports ( 82)

Promotion ( 271)

Web Design ( 83)

### Latest Products

```
latest($cid);
```

This displays the latest products in the default categories that user' selected. This will be displayed once a user select a category.

### Latest

Adsense Blog  
Themes Templates.

Make Money Within  
15minutes.

Worlds Greatest  
Mentors.

Stats Junky.

Write An Article In 3  
1/2 Minutes!

### Popular Products

```
popular($cid);
```

This displays the popular products.

### Popular

Information Product  
Creation Course.

Worlds Greatest  
Mentors.

Stats Junky.

Write An Article In 3  
1/2 Minutes!

Wordskills.

### Adsense Code

```
adsense1("ui");
```

This displays the adsense code named **ui** and because in the default data we don't have such record then there is no way or no google ads that will display.

HOME	<b>Administration Panel</b>
GENERAL INFO	
ADSENSE CHANNELS	<b>Adsense Ads</b>
TEMPLATES	1 greenleft.txt
CATEGORIES	2 greencenter.txt
MEMBERS	3 cbjunctionleft.txt
RESOURCE	4 cbjunctioncenter.txt
	Pages: 1

This is the sample data that we have after the installation and we only have four adsense codes and these are greenleft.txt, greencenter.txt, cbjunctionleft.txt and cbjunctioncenter.txt.

If we want to display the adsense code greenleft.txt then the code must be:

```
adsense1("greenleft.txt");
```

When we view the **greenleft.txt** adsense code we will see this:

**View AdSense Contents:**

**Channel Name:** greenleft.txt

**Code:**

The screenshot displays two AdSense ads. The first ad is for 'Nichecraft' and features a book cover for 'CRAFT' by Lynda C. Falkenstein. Below the cover, the text reads 'Nichecraft', 'Lynda C. Falkenstein...', 'New \$24.95', and 'Best \$10.00'. The second ad is for 'nCipher HSMs' and contains the text 'nCipher HSMs', 'FIPS 140-2 validated fast encryption and secure key storage', and the website 'www.ncipher.com'. The ads are set against a light green background.

So if we use **adsense1("greenleft.txt");** in the template then the above will be displayed.

You can also use **adsense2("greenleft.txt");** and **adsense3("greenleft.txt");** . They are all the same functions but for the intention of displaying only three adsense sites, now you have a pattern.

### Featured Ads

```
featured("What's New");
```

This will display the featured ads with the title What's New

This will show

## What's New

### **The Baby Sleep Solution Audio Program**

In just 35 minutes this audio program teaches you how to get your baby to sleep through the night every night - 100% Guaranteed. Ideal for parents whose toddler or infant has sleep problems.

### **JavaCityWarehouse: Wholesale Consumer Electronic Suppliers**

Wholesale Consumer Electronic Suppliers Contact Information Lists

### **Zune Reactor - #1 for Zune Downloads - Super High Conversions!**

Microsoft Zune Downloads - Movies, TV, Songs, Music Videos, Sports Shows, and More! Join the Hottest New Niche Since iPod or PSP! UPDATED! We can install Google/Yahoo/MSN Conversion Tracking. Affiliates Also Make \$\$\$ with iPodComet.com!

## Content

```
main("false");
```

This will display the default content. This will display the results of every search.

## Most Popular

```
mostpopular("Bestsellers");
```

This will display the most popular products and the title of our most popular products is **Bestsellers**.

## Bestsellers

Playing To Win.

Workoutpass: Over  
100,000 Workouts.

Meal Plans 101.

Self Defense &  
Martial Arts Secrets!

Lightning Speed Fitness  
Program.

## Sponsors

```
sponsors("Advertisers");
```

This will display the advertisers or our sponsors. The title of the sponsor box is **Advertisers**.

## Advertisers

Adsense Tips and Money  
Making Ideas

## Footer links

```
<div align="center"><a href="index.html" id=bottlink>home</a>  
| <a href="signin.html" id=bottlink>login</a> | <a  
href="signup.html">create a mall</a>  
| <a href="articleindex.html" id=bottlink>articles</a>  
| <a href="feedback.html" id=bottlink>feedback</a> | <a  
href="linktous.html">link  
to us</a> | <a href="add-resource.html" id=bottlink>submit resource</a>  
| <a href="showtop.html" id=bottlink>top resources</a>  
| <a href="advertise.html" id=bottlink>advertise</a></div>
```

Just add this in the footer to display:

home login **create a mall** articles feedback **link to us** submit resource top resources advertise

## Site Name

```
<?php echo $site_name ?>
```

This will display the site name. For example:

```
Copyright 2007. <?php echo $site_name ?>
```

This will display:

```
Copyright 2007. Top Money Mall Maker Sites
```

Note: Save it as .php file.
